

# SMALL DEPTH RECORDER

20M READINGS  
ON A SINGLE  
AA BATTERY

The RBRsolo<sup>3</sup> D is a compact, lightweight, and versatile single channel logger. The logger offers flexible measurement schedules, standard sampling up to 2Hz, and optionally up to 32Hz. It also features large memory, more power for extended deployments, and USB-C download for large data files.

## FEATURES

The RBRsolo<sup>3</sup> D recorder is available in the following configurations:

- ▶ RBRsolo<sup>3</sup> D up to 2Hz continuous sampling
- ▶ RBRsolo<sup>3</sup> D|fast16 up to 16Hz continuous sampling
- ▶ RBRsolo<sup>3</sup> D|fast32 up to 32Hz continuous sampling
- ▶ RBRsolo<sup>3</sup> D|tide16 up to 16Hz bursts with tidal averaging
- ▶ RBRsolo<sup>3</sup> D|wave16 up to 16Hz bursts with wave analysis

The RBRsolo<sup>3</sup> D makes it easy to configure the optimum sampling regime for your measurements whether the recorder is moored, towed, or profiling. The large data storage capacity and fast download ability facilitate long deployments with high sampling rates. A dedicated desiccant holder makes it simple to replace desiccant before each deployment. Dataset export to Matlab, Excel, OceanDataView<sup>®</sup>, or text files makes post processing with your own algorithms effortless.
